

Interactive Reserve Analysis

DMA'S WORKING SESSION

The “working session” is intended as a means for us to gather additional information that was unknown to us. It is also designed to educate the Board, familiarize them with their responsibilities, explore reasonable funding plans and make any revisions that the Board deems necessary. However, it is a misconception that we will allow the Board to rewrite our report. Our credentials, qualifications and experience establish us as the professionals in this matter and we have to limit changes to only those that meet our criteria and the published standards that we subscribe to.

The software program that you are about to view is formatted in Microsoft Excel but contains proprietary programming and program coding that is not available for distribution to outside parties. Copies will be made available in Adobe's Portable Document Format and in program limited versions of Microsoft Excel for the client's use in conjunction with this project and this project only.

If you have additional questions about DMA reserve studies, please contact us at our office at 804-644-6404 or by e-mail at admin@dma-va.com.
